1	Wanted more instruction & examples on risk in a project plan like the great example of cheating the WBS. Should talk about "Clarity" less. It was over kill.

15	I really appreciate the honest comments like "that might not be where you want to work" setting levels that aren't acceptable. Document trend of not getting what you need.

32	Very cold. Lunch was OK but could be better. It was pleasant to have someone that took PMI at heart.
33	More emphasis on tools and techniques and less on personal stories. Rick's high "I" personality focused the content more on his personal experiences.
34	Rick was wonderful, the real true stories were helpful and he is clearly passionate about project management -- Thanks Rick!
35	Too cold - room facility. The speaker was fantastic, I have many 'take aways' from this seminar.
36	The chairs suck. The room felt like a walk-in freezer. A hot meal would have been nice. The speaker has only 22 tweets. That's it? 22? I average 25 a day. Step it up Rick.
